

LICENSE PLATE HOLDER W/12 VOLT LIGHT INSTALLATION INSTRUCTIONS

1
Switch the key to the OFF position and engage the Parking Brake.

2
Note: This License Plate Holder is designed to function on 12 volts ONLY.

The Black wire is **Positive (+)** and the White wire is **Negative (-)**

3
Using the supplied self tapping screws, attach License Plate Holder to your desired location as shown.

Use caution when selecting a mounting location to avoid pinching wires on back side.

Attach the wires to your 12v switched power source.
