

INSTALLATION INSTRUCTIONS

CLUB CAR RADIO CONSOLE

- C-5-50** - ABS Black Finish
C-5-50RB - Regal Burl Finish
C-5-50CF - Carbon Fiber Finish

- Part List:
- Console
 - Top Mount Bracket
 - "L" Bracket For Rear Radio Support
 - 9 - #8 X 1/2" Phillips Round Washer Head Screw
 - 8 - 3/16" Large Flange Rivet Heavy Duty (3/4"-5/8")
 - 8 - 3/16" X 3/4" Fender Washer
 - 1/2" Black 2 Sided Foam Tape
- (Radio & Speakers Not Included)**

Tools Needed: Rivet Tool, Cordless Drill with 3/16" Phillips Bit
Phillips Screw Driver & Pencil

INSTALLATION

Speaker holes are cut for 6" round speakers.
Speakers not included.

IMPORTANT! You must have a 12 volt power supply before connecting your radio.

STEP 1:

Remove top support bolts.

STEP 2:

Place Radio Console up against the top inbetween the supports and line up the bolt holes. Place bolts in holes to hold console in place and use pencil to trace around console.

Note: Radio speakers do not need to be installed at this time. See step 5

STEP 3:

Align mounting bracket to lines drawn with pencil. Mark drill holes and drill through top with 3/16" drill bit.

STEP 4:

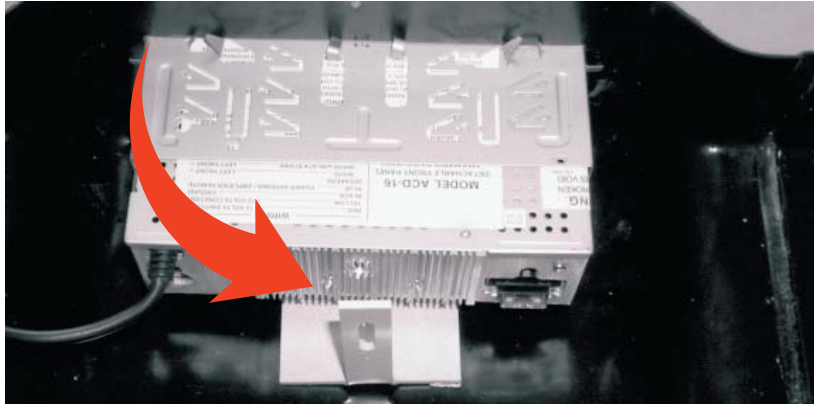

Use 8 rivets provided to attach top mounting bracket.

INSTALLATION

STEP 5:

Install radio and speakers per manufacturers instructions. Make sure to ground radio. Use small "L" bracket (shown below with arrows) to support rear of radio. Attach using the bolt or screw on rear of radio. Adjust to correct height and then tighten screw. When location is set lift up the rear of radio to remove cover on tape on bottom of bracket and press in place.

INSTALLATION

STEP 6:

All wiring should be done at this time. Suggestion: The front supports can be used to run wiring down to body by drilling holes big enough for your wire to run through a grommet.

We make no recommendations on how this is done.

STEP 7:

Lift console up over bracket as shown below and attach using screws provided.

STEP 8:

Reinstall top support bolts and nuts that were removed in step 1.
