

Golf Cart Column Installation

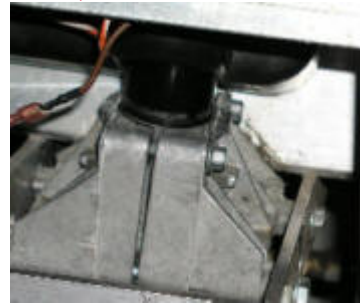

(1992 To Present Club Car Installation Shown)

Step 1: Remove the Front Cowl

Step 2: Remove the Upper U-Joint Bolt

Step 3: Loosen the four lower column support bolts and remove the old column

Step 4: Loosen the dash and tilt it back to allow easier clearance for the wiring on the new column

Step 5: Slide the column into the lower column support. Wires should exit the column at 12 o'clock.

Step 6: Attach the U-Joint to the column and retighten the U-Joint bolt and the column support bolts.

Step 7: Install your knobs and handles as shown on the back of the dress-up kit

Add your favorite wheel and adaptor and you are ready to go!

Note: The top of the column is the same as a 1969 or newer GM passenger car.
