

## FUSE HOLDER INSTALLATION

Used on EZ-GO Head Light Kit

**BUGGIES**  
UNLIMITED

### INSTALLATION INSTRUCTIONS

As an additional protection, we have provided a fuse holder and fuse, to be installed on the main positive lead for the Head Light Wire Harness. Please be sure to install this fuse holder assembly before installing your new wire harness.

1. Locate fuse holder and butt connector. Cut fuse lead wire in center as shown in figure 1.
2. Strip the insulation from the red wire of the main wire harness, by 3/8". Repeat this process on one end of the fuse holder assembly. See figure 2.
3. Using a suitable crimping tool and the butt connector supplied, crimp the fuse holder lead and the wire harness red lead together. See figure 3.
