NFB EZ2 MTL
Gunmetal Nerf Bars

Gunmetal Nerf Bars

The kit will include hardware with 6 spacers. Three for each side. The car will have 3 pre-existing holes. Insert the 3 bolts into the nerf bar holes. Place the 3 spacers on each of the bolts. Set the nerf bar in place making sure the spacers stay in place as well as the top mounting spacers.

Note: It will work best if you leave all the mounting bolts loose until all hardware is in place and then tighten completely.
