

Performance Exhaust

EZGO 4 Cycle Gas Engines 1992-2007

ENG EZ0 1146

Installation Instructions:

1. Remove cart's seat to access engine
2. Remove existing exhaust system by unscrewing the two bolts that attach it to the engine. You will need a 12mm ratchet or wrench. Keep hardware for later use.
3. Place new exhaust system in place so that plate on exhaust system matches up with the plate on the exhaust manifold. Attach with two bolts from step 2. (See Figures 1 & 2)
NOTE: When exhaust system is mounted correctly, the muffler should be located above rear axle on the passenger side. (See Figure 3)
4. Tighten all hardware. Place cart's seat over engine.
